Dear Sagar,

On behalf of the Graduate Program Committee of the Department of Mathematics and Statistics, I would like to offer you a 50% TA position for the fall 2022 semester. Congratulations! This will be the first step in your journey to completing a master's degree in Mathematics with specialization in Pure Mathematics. This appointment may be renewed based on performance and continued eligibility.

Although the current fall 2022 schedule may require several changes, based on your background, the possible assignments for this TA position include recitation classes in MATH 250 (Calculus III) or MATH 152 (Calculus II), sections of QR 101 (Quantitative Reasoning), or sections of MATH 120e (College Algebra). A few hours per week in the department's Tutor Lab may also be part of this position.

I have informed the Graduate and International Admissions Office at SIUE about this TA offer. You can contact their office with regards to the I-20 application process. I am copying their office and the Director of Graduate and International Admission, Jim Monahan, in this email.

As soon as we are permitted to, our department Office Support Associate, Annette Musenbrock, will contact you with the necessary paperwork. Annette is copied in this email. The department chair, Dr. George Pelekanos, and assistant chair, Dr. Ed Sewell, are also copied in this email. We will inform you of your TA assignment once that list is finalized.

I intend to meet with all the Teaching Assistants in the department the week before we start the fall 2022 semester. This will give everyone an opportunity to be able to start the fall semester on a good note and to help with the transition as a Teaching Assistant. Watch out for an email before August on the day and time that we will meet.

If you have any questions, please do not hesitate to contact me. I look forward to meeting you this fall and once again, congratulations on this Teaching Assistantship award.

Sincerely,

Dr. Agustin

Graduate Program Director
